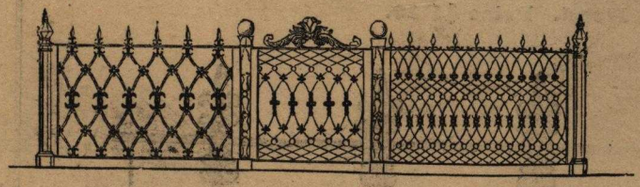
NEW-YORK WIRE RAILING COMPANY.



COMPOSITE IRON RAILINGS.

In consequence of the greatly increased demand for the peculiar style of Railing made by the New-York Wire Railing Company, known as the Composite Iron Railing, the Company have largely added to their facilities for manufacturing, and are now prepared to execute orders to any extent. As the Composite Iron Railing is a different article to their celebrated Wire Railing, and is used for a much heavier fence for enclosing public grounds, dwellings, and more especially for cemetery lots. The Company take this method of setting forth some of their many designs, with the prices attached. Their illustrated catalogue, known as the "New Phase in Iron Manufacture," contains descriptions of, and enters into more fully, their various branches in the Iron manufacture, and will be forwarded to any one desiring it. In this Circular they simply set forth the prices and advantages of the Composite Railings. The peculiar advantages of this Railing are—

1st. ITS STRENGTH AND DURABILITY; IT IS A WROUGHT IRON RAILING; THE DIFFERENT WROUGHT IRON JOINTS ARE COVERED BY SOLID ORNAMENTAL CASTINGS, SO THAT THERE ARE NO CREVICES IN WHICH MOISTURE CAN COLLECT, TO CAUSE RUST.

2d. ITS BEAUTY AND GRACEFULLY DECORATIVE CHARACTER.

3d. IT IS EASILY HANDLED, AND NOT SUBJECT TO HEAVY CHARGES FOR FREIGHT.

4th. THE FACILITY WITH WHICH IT CAN BE SET UP BY ANY BLACKSMITH OR OTHER MECHANIC.

Orders can generally be filled within ten days. They should, in all cases, be accompanied by a Sketch or Diagram, showing the measurement and the line of the Railing.

The situation of the Gate should be designated on the Diagram. If the line of the Railing is level, it should be so stated. If there is any grade or descent on the line, it should be specified. The line given will be understood to be the Centre of the line of the railings; if otherwise, it should be explained.

The posts are sometimes set in a coping, but more frequently in stone blocks, about six feet apart. Granite blocks suitable for the posts, and drilled to receive them, will be furnished if desired, at $1 50 for each stone.

The prices given are strictly Cash. Parties ordering may, at their option, furnish references for payment on presentation of bills of lading, or may forward Cash in advance.
